

Prevention and Risk Reduction Solutions for the Entire Community

The reliance on data and information regarding the dangers lurking within the buildings in your community is paramount to Prevention and Community Risk Reduction (CRR) success. If you're overwhelmed with competing priorities, unaware of the hidden threats and risks, and under pressure to perform with limited human and capital resources; it's time to seek the alternative solutions IROL provides.

SOLUTIONS AND SERVICES

Inspection, Testing, and Maintenance (ITM) Compliance and Review Program is a cost-free service that provides state-of-the-art web-based fire and life safety system reporting and associated code deficiency remediation. Providing real-time data and awareness regarding the conditions and readiness of the systems within a jurisdiction increases response and overall compliance.

Developed by and created for AHJs, IROL's Review Department aids in the overall management of submitted ITM reports and follow-ups on deficient system. *This core functionality of IROL alleviates the administrative workload as much as 60% and assists in driving overall compliance.* Our fire and life safety experts provide professional, first-hand experience, which increases an owner's education and response regarding deficiency remediation.

Fire and Life Safety Risk Assessments are your direct connection to the Business Community. This solution provides the ability for owners to complete a general assessment regarding the conditions of their buildings and submit directly to an AHJ. Owners are more inclined to take action when given the tools or resources to do so. This is an unmatched Community Risk Reduction effort helping departments gain a wider perspective of the hidden threats within their buildings.

Fire Inspector's Reporting and Pre-Plan Solution offers an easy, efficient, and innovative way of performing occupancy inspections in the field including the ability to capture Pre-Plan data and information.

Customized Programming capabilities provide the continued growth of services and solutions fitting the needs of all our customers.

API Options allow all entities (AHJ, Service Providers, and Owners) the ability for IROL to integrate with other internal software solutions. Contact us today for more information.
