# THE GOOD NEWS

# THERE IS NO SUCH THING AS CHRONIC DISEASE

There are underlying imbalances stemming from deficiencies & toxicities that when rebalanced allow for true healing to take place in the body.

Replace the deficiencies & remove the toxicities and you will wipe away the dis-ease that was merely a set of symptoms of those underlying imbalances...

# 95% OF ALL DIS-EASE & EARLY MORTALITY IS PREVENTABLE

New Research: Can You

The infographic is a circular diagram with a central red heart containing a white play button icon and the text 'Cardiovascular Disease'. The circle is split into two main sections: a dark grey section on the left labeled 'Non-modifiable risk factors' and a green section on the right labeled 'Modifiable risk factors'. The non-modifiable section includes 'Age', 'Gender', 'Genetic Factors', and 'Race & ethnicity'. The modifiable section includes 'High BP', 'Smoking', 'Diabetes and Pre-diabetes', 'Physical Inactivity', 'Obesity', and 'High blood cholesterol'. A blue audio waveform graphic runs horizontally across the middle of the circle.
