

1

Did you know that the Earth is a globe  
Spinning round in space?  
And did you know that the land and the sea  
Make a great big wonderful place?  
Oh-oh spinning around in space  
Oh-oh it's a wonderful place

Chorus:

Come on, let's go  
Tell me what you know  
Explore the planet with me  
We call it geography

Some of it's cold, some of it's hot  
If you're near the equator or not (x4)

2

Did you know that the land on our planet is divided into parts?  
There are seven continents, let's learn them off by heart  
Oh-oh spinning around in space  
Oh-oh it's a wonderful place

Chorus

Outro

Let's go to Asia, Africa, North & South America  
Antarctica, Europe and Australia (repeat x 4)
