How to master Thai with this course?

I have developed this course with various learning materials to help you learn Thai language effectively. Here is my simple instruction to help you bring the best out of each learning session

1. **Before the lesson**

Most of the lessons in a chapter are relevant. Spend 5-10 minutes to quickly go through your notes or review vocabulary on [Quizlet](#).

2. **During the lesson**

Concentrate on the lesson. It is very quick and easy to go through. Play, pause, and replay anytime you want to note down some examples, tips, and techniques, as well as highlight the important keys to the textbook.

3. **Right after the lesson**

It is very important you understand what you have learned from the lesson. Make sure everything is clear to you. Do in-lesson quizzes as well as exercise if provided. There is always a reminder below the video lesson.

4. **Anytime after the lesson**

Practice [Quizlet](#) on to go. Really! This is a very genius application to help you learn and review Thai vocabulary with Thai audios. Every word you have learned will be in the flashcard sets.
