Development Tools	:	Eclipse, Net Beans
Build Tool	:	ANT
Logging Tool	:	Log4j
Directory Server	:	LDAP, Active Directory

Professional Experience

Project #01

Description:

It is complete migration project of Xyz where we are implementing it Phase by Phase into Sailpoint IIQ.

At GE Infrastructure these tools creates users & provisions basic access required for Employee and contractor. This tool currently manages accounts, accesses of about 6 Lakhs users including employees, contractors, and customers in various countries across the globe for about 60 applications in sub-businesses like Aviation, Energy, Rail, Water and Oil & Gas. Because of huge number of users and complex functionality it has become very serious problem to support and debug the issues. This project was introduced to do the performance tuning so that it can be easily supportable by support team.

Roles and Responsibilities:

- Performed the role of SailPoint Developer (IIQ-6.3) from past 1year, for a Fortune 10 company. The job responsibility included development of Workflows, Life Cycle Events.
- Performed customization based on client requirement, which included creating Custom Task, Custom Reports, Custom EmailTemplates, Custom forms and minor UI Customizations.
- Worked on Provisioning Integration Module (PIM), to leverage the Sun IDM system as the provisioning engine.
- Worked on Support activities like daily monitoring tasks and application failures.
- Played curtail Role in Configuration Management and Build Process.
- Played curtail Role in Release Management Process.
- Involved in Patch Up-gradation process Sailpoint IIQ 6.3P2 to Sailpoint IIQ 6.3P3.
- Worked on Certifications.
- Knowledge on Manager Correlation and Account Correlation.
- Worked on Production Issues.
- Multi-Layered Environment Setup for Sailpoint IIQ.
- Worked on Dashboard New Quick links creations.
- Worked on creation of Roles and Entitlements with other applications.
- Knowledge on Sailpoint Architecture.

Project 1#02

Description:

Responsibilities:

- Developed **Quicklink** for CAS Attribute Request for AD Provisioning of the attributes
- Defined various Roles using **Role Mining** as per the Business Requirements
- Configured **Lifecycle Events** to assign the Birthright access
- Onboarding of applications on to SailPoint environment
- Building different types of connectors like LDAP, Delimited File and Active Directory
- Aggregation of accounts and Groups of various Connectors
- Scheduling of various Certifications
- Developed **BuildMap, Correlation** and other associated Connector Rules
- Implemented Scheduled Custom task to disable the contractors on their Termination date/ to send approval request to extend the Termination date (if required) before 2 weeks.
- Implemented Termination process for Employees.

Environment: SailPoint IIQ 5.5, Java, XML, Tomcat 6.x, MySQL, Active Directory.

Project #03

Description:

This Project will be focused on the GRCOps IT Risk Assessment Integration into GE Capital IdM. GRCOps IdM Automation Integration process will provide Digital based Provisioning of Accounts to the users who are new to Capital IDM and existing users who doesn't have the GRCOps IT Risk Assessment application access. Auditing requests, reporting abilities, Email notifications and some more features are provided by GE Capital IdM framework.

Responsibilities:

- Worked extensively on creating workflows and sub workflows.
- Worked on workflows which contains conditions to take actions from the IdM side.
- We Implemented Separate Workflows for Provisioning Process and Deprovisioning.
- Worked from the design, Implementation and unit testing.

Project #04 : Xyz
Role : Technical Lead,
Duration : Xyz

Project Description:

The scope of this project includes design of Configuring Active Directory, HRMS, Oracle EBS applications for Request Access, Access Certification & Oracle EBS Single Sign On. User from the organization need logs in to TrewIAG and request access for Oracle EBS. Based user even New Hire, Conversion, Re-Hire or Termination, Once TrewIAG receives the event it need to trigger the event to target systems as per the policies.

Contribution

- Involved in gathering the requirements from the customer and implementing it with the onshore team.
- Configured Applications for Active Directory, HRMS (Delimited File), Oracle EBS. Configure reconciliation tasks, provisioning task for all applications.
- Configured SSO for Oracle EBS application and created quarterly periodic certification for Oracle EBS.
