How do you find ordering clothes on Amazon? To be honest, I've tried it a few times and I must say, I've been pleasantly surprised. **You don't have to worry about traffic or parking, do you?** You can just scroll through pages and pages of items, compare prices and styles etc. What I like most is **you're not forced to buy anything, are you?**

I also like the fact that you can leave the website at any point. **Some other shopping websites keep sending you reminders and notifications, don't they?** 'You have items in your basket', or 'buy now and get a further 10% off' etc and **they can really get on your nerves, can't they?** It can be really off putting.

I truly think Amazon have done their research, haven't they? They know how to behave with their customers so they don't scare them away. Well done Amazon! Keep up the good work.

New Words:
