

PENLAND SCHOOL OF CRAFT

Seth Gould Penland Workshop Materials List

Are there books you would suggest students read before taking this online workshop?

"Professional Smithing" by Donald Streeter - this is not a necessary read before the demonstration, but a great book to accompany the topic.

What is the range of techniques you intend to cover?

Controlled hand forging at the anvil, and an in-depth look at filing

Is there any additional information that could be useful to students before enrolling?

None

Below is a list of what students will need for the workshop:

Item and Quantity Needed

3/16" x 1" mild steel

<https://www.mcmaster.com/8910K264/>
