

Perfectly Personal Word Art Triangle Homework Part 2

© 2019 Jenifer Juris

TOU

Part Two of the homework is simple and contains two parts. One, you need to practice customizing them. And two, you need to use those customized templates in a project.

Now let's go over the guidelines for this homework.

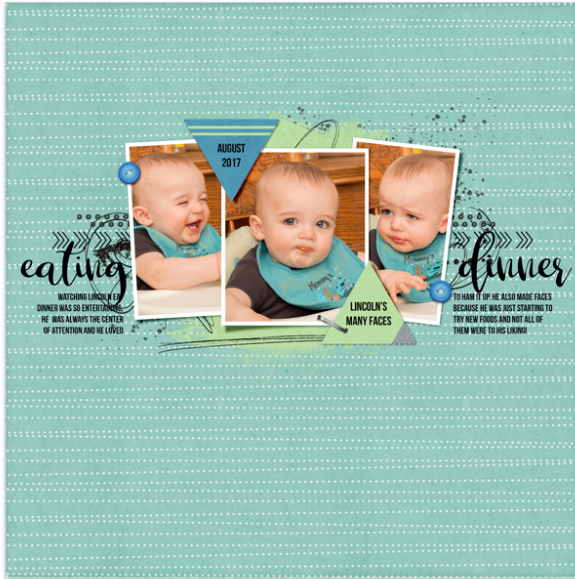

- #1. Use at least 2 of the triangle templates in a project.
- #2. Use any of the four triangle templates that you wish.
- #3. Remember to revisit the Customization Rules from Section 1 of this class. The rules for customizing a paper strip are the same as they are for triangles.

Now, let's take a look at the triangle templates I decided to use and how I customized them.

As you can see, I use coordinating colors and just a touch of pattern. I also made sure to use a matching font on both.

Here's the scrapbook page I made using my two customized templates. I used my two triangles to help tell my story and I also placed them so that they would point towards the main photo. This draws the eye to the photos while also providing context as to what is happening and when.

Now, it's your turn. It's time for you to create something using triangles. It could be a card, a scrapbook page, a photo collage, or anything in between!
