### Terms of Use

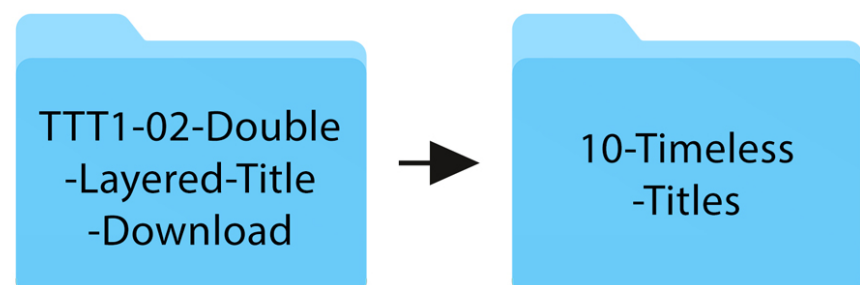

NOTE: Complete Lesson 2 before continuing with these challenges.

Congratulations! If you completed Lesson 2, you now have one more story told and one more page to add to your scrapbook album. Let me help you go farther.

### Homework: Add To Master Folder

In the homework for Lesson 1, you were asked to create a master folder called 10-Timeless-Titles. Your homework for Lesson 2 is to:

- Place your TTT1-02-Double-Layered-Title-Download folder from Lesson 2 inside the 10-Timeless-Titles folder.

## Challenge #1: Create a New Design

The Title PSDs you create in this class are designed to be versatile. So, test out the process.

- Create a page design completely different from the layered quick page you were given.
- Add the Title PSD layers to your new page.
- Change the fonts and colors to match the subject of your page.
- TIP: Make sure your title does not look shadowed.
- [Save your page for sharing](#) and post it in the [Community Gallery](#).

## Challenge #2: Create & Send a Card

Greeting cards are not just for making your friends and family feel special, they are also useful for when you want to create something pretty without having to fiddle with photos or journaling.

- Create a 6x4 card design using the Title PSD layers.
- Change the fonts. See how creative you can get.
- Change the colors to match any papers or elements you add, or just two contrasting colors. Make sure your title does not look shadowed.
- If you add additional words to your title, color them to match your double-layered title.
- [Save your page for sharing](#). Now that you've created it, you might as well send it via email or text to someone. It will be guaranteed to make their day!
- Post your card in our [Card Library](#). You can post it as a flat card, or you can use our [Tent Card Template](#).
