

Sweep Melody (Hard)

Lesson Structure:

1. The melody
2. Slow playthrough
3. Playthrough with the backing track

The Melody:

- This melody is slightly more challenging than the others because it doesn't stop — we're sweeping the entire time.
- **SWEEPING TIP:** whenever you have more than once note per string, you only pick once.
- Whenever you go back a string, switch picking direction.

♩ = 130

2

3

4

5

Practice Routine:

1. Practice this hard melody until you can play it at all tempos of the backing track.
2. Write your own sweep melody for the backing track. The chords are Dm, Bb, C7 and A7 and the last chord of each section is Dm. Challenge yourself when you write this melody.
3. Once you complete steps 1 and 2, post your work in the group. Title your videos "Sweep Melody (Hard)" and "Original Sweep Melody 3".

When can I move on?

Move on when you can actually sweep this melody you ugly, pathetic swine.

Why am I doing this?
