

Hi! In this course, you'll learn how to take an existing print document. We'll use a multi-page magazine as an example, and with just a few clicks, convert it to an online digital version. This is super easy with in5 and works equally well for newsletters, catalogs, annual reports, virtually any type of print publication. Then we'll begin to dive into some of the many settings and in5 that you can use, if you wish to customize the display and reading experience of the document. We'll also explore how to make your document responsive on different sized screens. We'll finish up by learning several ways that you can make your document take full advantage of the digital platform such as creating mobile article text, adding video, buttons, interactive menus, scrolling frames, and slideshows. So let's roll up our sleeves and get started.
