

Collect Your Photos

When you find your photos in one of these locations, move them to a designated folder or hard drive that will be backed up. A backup is an additional copy of the files, just in case anything happens to the originals. One secure and easy option is to [back up online](#). The software will automatically upload new photos as you save them onto your computer. For the most secure backup, also consider making a second local copy of the files on an external hard drive.

- Pictures Folder on your Computer
- Dropbox
- External Hard Drives
- DVDs/CDs
- USB drives
- Camera SD cards
- Phone camera roll

Remember to check all the phones in your home, even those you don't use any more. If the screen is broken, try plugging them into your computer to download and save the photos)

- Cloud services (like iCloud, Google Drive, One Drive, Dropbox)
- Another computer (eg laptop, tablet)
