what to do. The transition from theater, which depends on dialogue, was more difficult than I had imagined—indeed, many stage actors, even those who didn't disdain the new medium or moving pictures, did not make the change successfully. Hanako Minatoya was one of the few who was equally accomplished in both realms. I was learning under her tutelage every day.

The most important point is that it is inconceivable that people could ever have developed their more complex tools without their ability to manipulate symbols and communicate with one another in symbolic languages.

It means that making complex tools is only possible if symbols and language are used. The two negative words are inconceivable (= "not able to be imagined" or "not possible") and without (= "not having").

Putting them together, "not possible ... not having ..." means "only possible ... having ...".

So the sentence could be rewritten "it is only possible that people could have developed their more complex tools by having the ability to use symbols and language."

NEGATIVE

The attempt to prove self-evident considerations is a worthy deed because the consequence of being reduced to the state of delusion is too dire.

The first negative word is ridiculous which means "nonsensical."

The second negative is were it not for which means "in the absence of."

In the absence of the consequence, the attempt to prove something that makes common sense would be ridiculous. However, because the threat of being reduced to vassalage by the state is real, the attempt is worthy.
