

"Ojo de Luna" Pendant - Materials List & Gallery

Materials list:

- 11/0 Delicas: 4 colors; about 2 grams of each color – see [Gallery](#) on the next page for colorways
- 1 ~ 18mm Luna Cabochon or Czech Backlit Cabochon
- 50 – 100 ~ 15/0 Seed Beads (used on bezel and accent)
- 12 ~ 3mm Bicones
- 6# Fireline
- Size 12 Beading Needle

All beads shown in the colorways are 11/0 Delicas unless noted - approximately 2 grams of each color. I used two different colors of 15/0 Seed Beads for several colorways, so their usage is also listed. I have **not** included any colorways using the 18mm Czech Backlit Cabochons, but some of them are shown in the videos and if you are interested in the colors used, please leave a comment in the Course Curriculum.

Important Note! The numbers for 15/0 seed beads may **not** be the same as numbering used by Miyuki or Toho. They were purchased at my local bead store and their distributor rennumbers the beads. However, I think many bead shops in the USA get their beads from the same distributor, so the numbers could be the same depending on where you purchase your beads. I think the color name will help you when choosing your beads.
