

Weekly Challenge

WinForms ToDo List

Primary Challenge

Create a WinForms app that maintains a todo list in a ListBox. Allow a user to add, remove, edit, and complete items. Double-clicking on a list item should mark it complete.

Bonus Challenge

Set up the ListBox so that when an item is selected, you can use the arrow keys to move it up or down in priority. Ensure that the priority number is displayed on the item and that it changes when the item moves.

“Practice makes the master.”
