“The **flex-flow** property is a shorthand for setting the flex-direction and flex-wrap properties, which together define the flex container’s main and cross axes.”

SOURCE: [CSS Flexible Box Layout Module Level 1](#) by W3C.

flex-flow:

row
row-reverse
column
column-reverse

flex-direction

nowrap
wrap
wrap-reverse

flex-wrap

If omitted, it's set to default (nowrap).
