# Bulk Create Pinterest Pins with ChatGPT and Canva

This guide explains how to use ChatGPT and Canva to bulk create Pinterest pins. It provides step-by-step instructions on using Canva templates, generating content with ChatGPT, connecting data in Canva, and customizing pins for Pinterest. By following this guide, users can efficiently create multiple pins for their Pinterest account. You can take a free trial of canva pro with my affiliate link: bit.ly/2zEdhKy (I benefit with no additional cost to you)
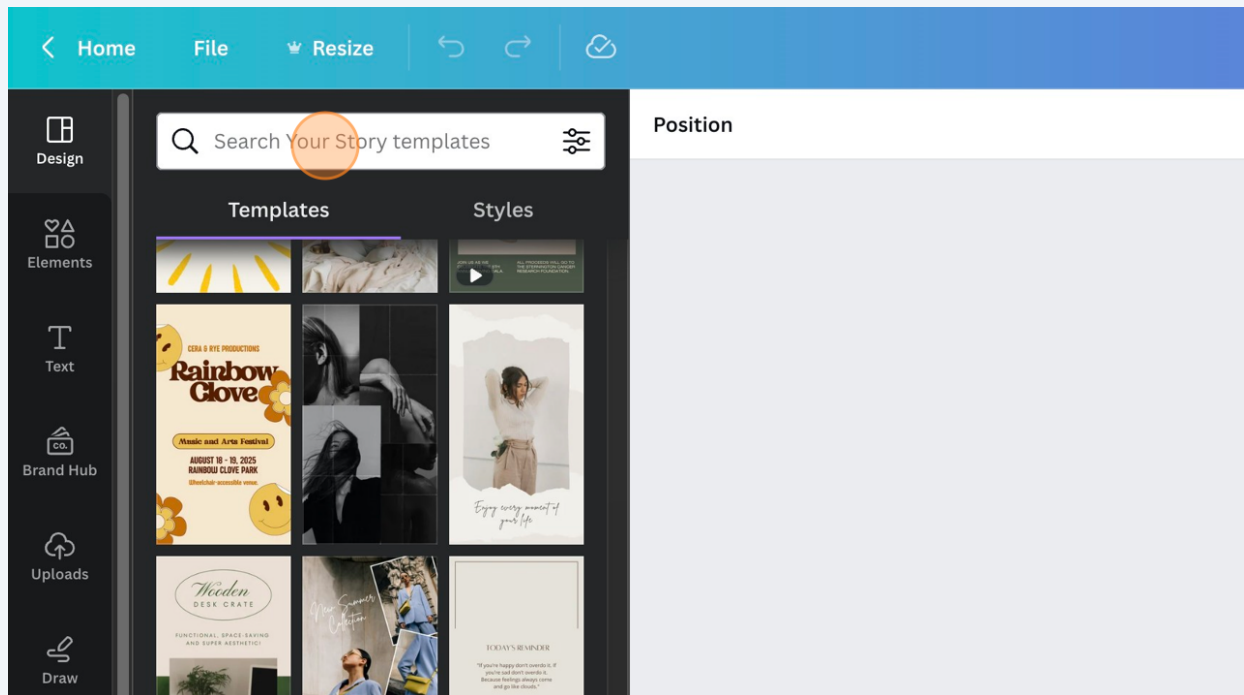

1 Navigate to www.canva.com

**2** Do a search for Instagram Stories or choose Instagram story from the menu
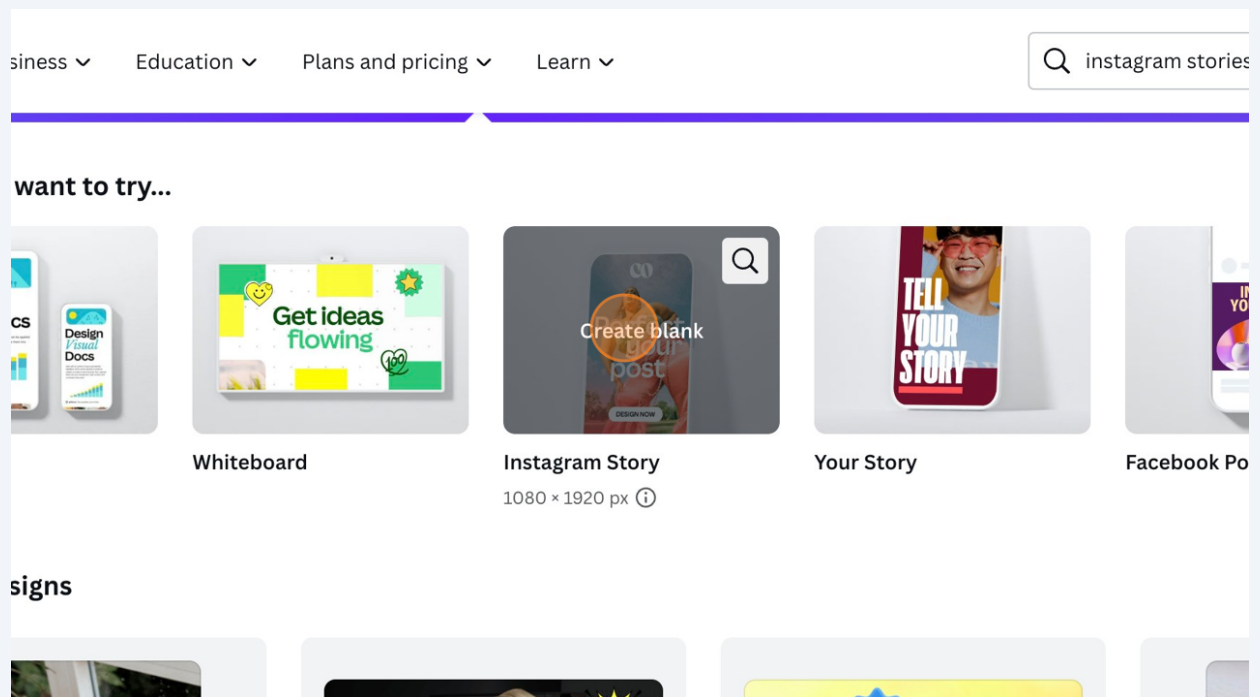

3 You can use the search filter to search templates by keyword (such as quotes). If you click on the 3 lines to the right, you can also access additional search filters.

4 Scroll through the templates and click to choose one.

5 Now, edit any items on the pin that you don't want to replace when you connect data after populating items in ChatGPT.

6 In a new tab, navigate to chat.openai.com

7 Use this prompt: Pretend you are a real estate agent. Give me a list of 52 excellent tips for homeowners that want to sell their house. Put "To sell your house faster" before the tip.
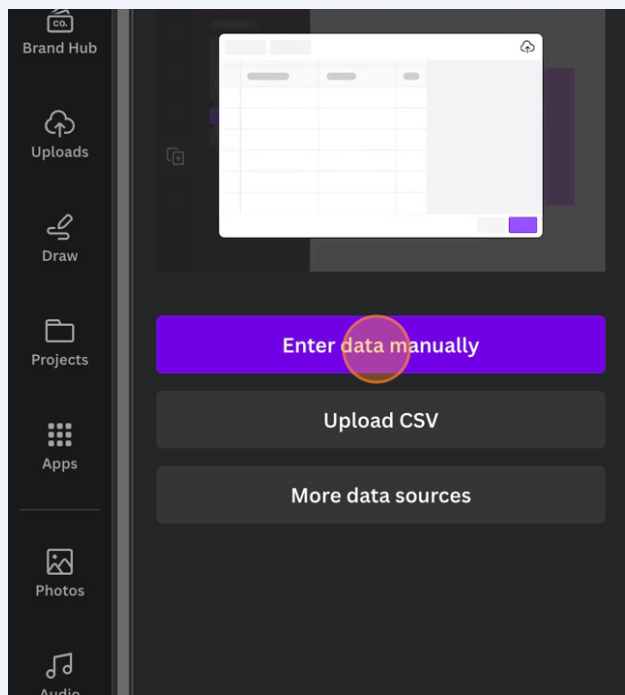

8 In Canva, click Bulk Create. If you don't see it, you can find it under apps. You will need a Canva Pro account. You can use my affiliate link to take a trial: bit.ly/2zEdhKy

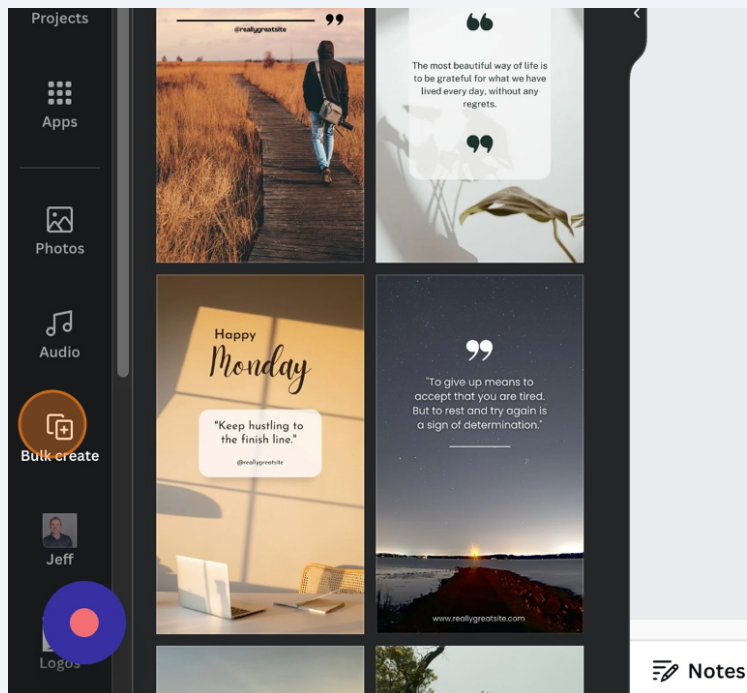

9 Click "Enter data manually"

10 Paste your item in the first row. You can ignore the second row. If you have more than one item to replace, as if you had a title, and text, you can use the extra columns. You can also click the add image option to add a column. Click on any row, and choose photos from your folders. Then, you can replace the background image without dragging and dropping in the steps ahead. You may need to add a frame in the background from elements.

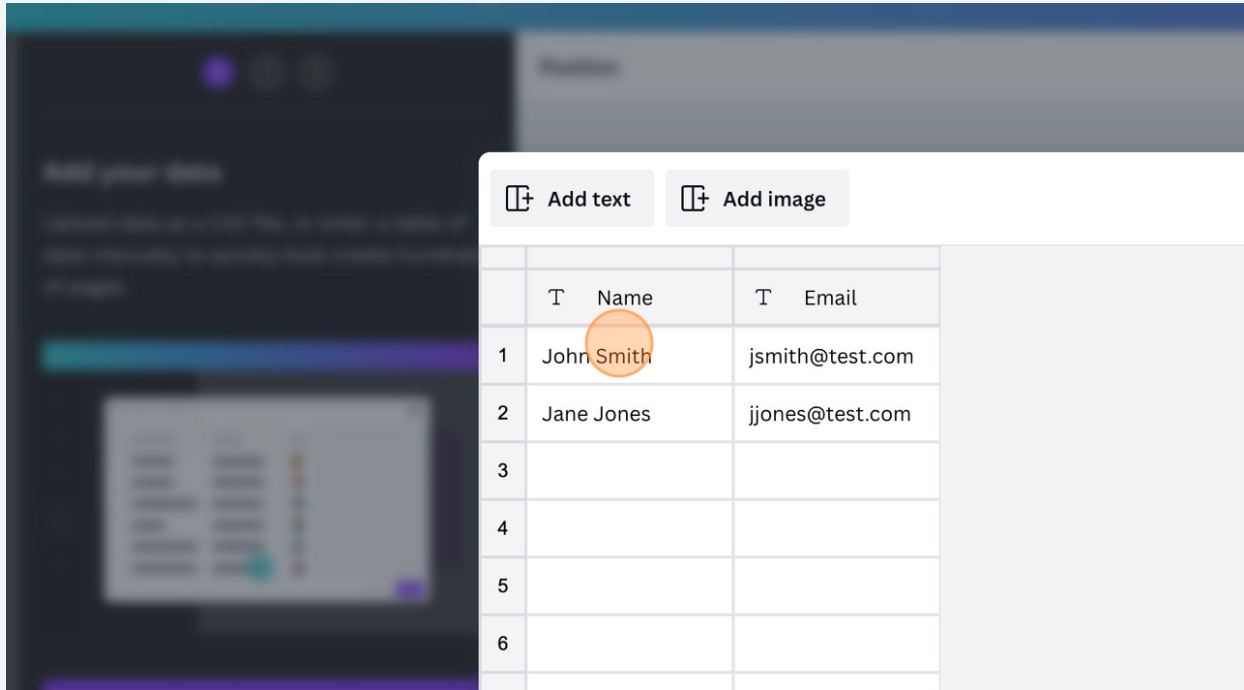

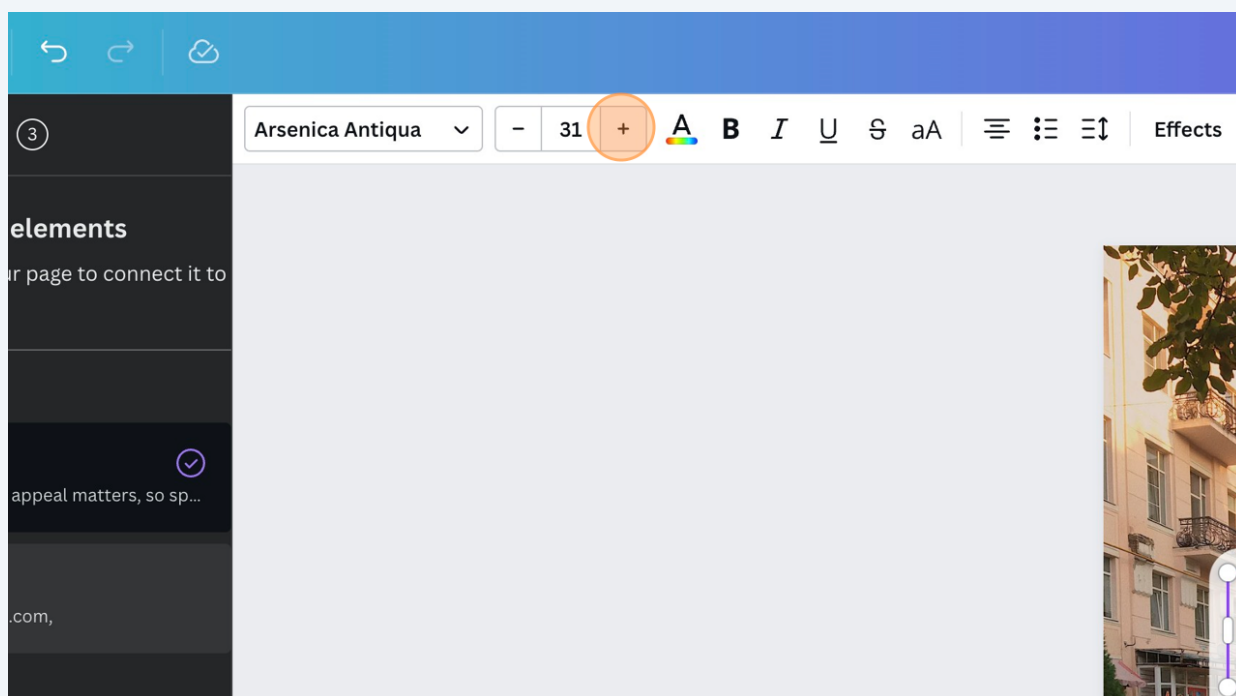

11 Click "Done"
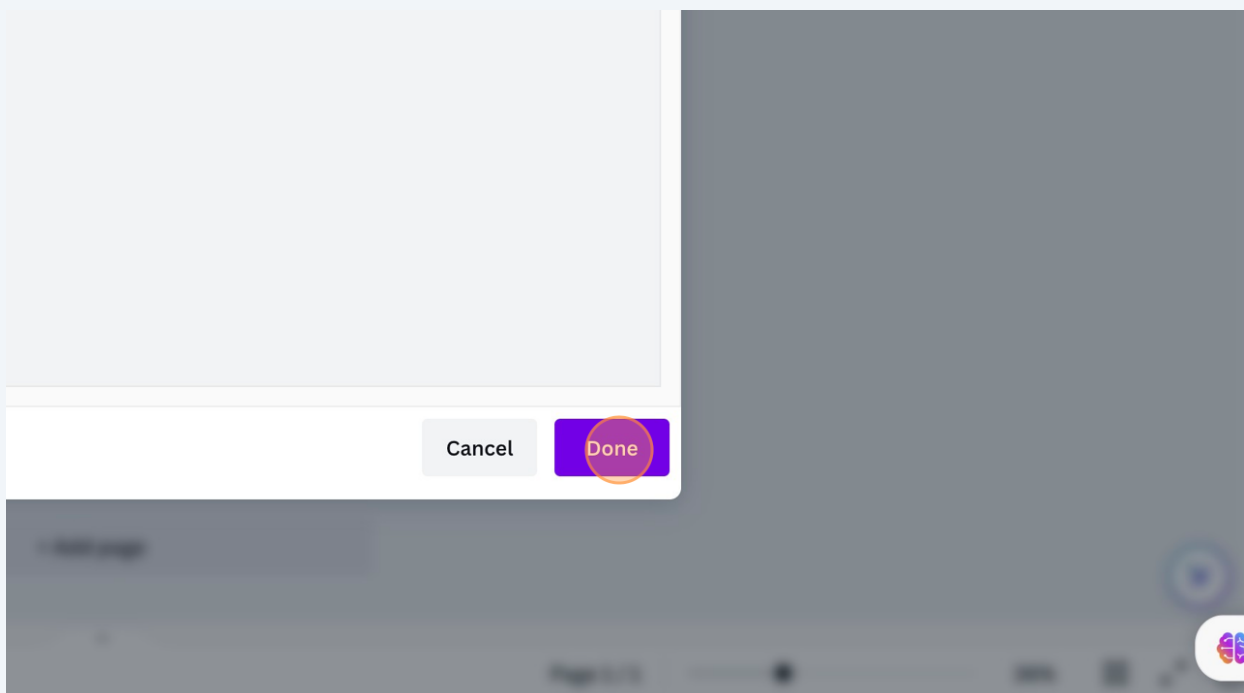

12 I suggest pasting your longest sentence from your tips in the section where your tip will go. Then, adjust the size of the text to make sure it fits before you connect the data.

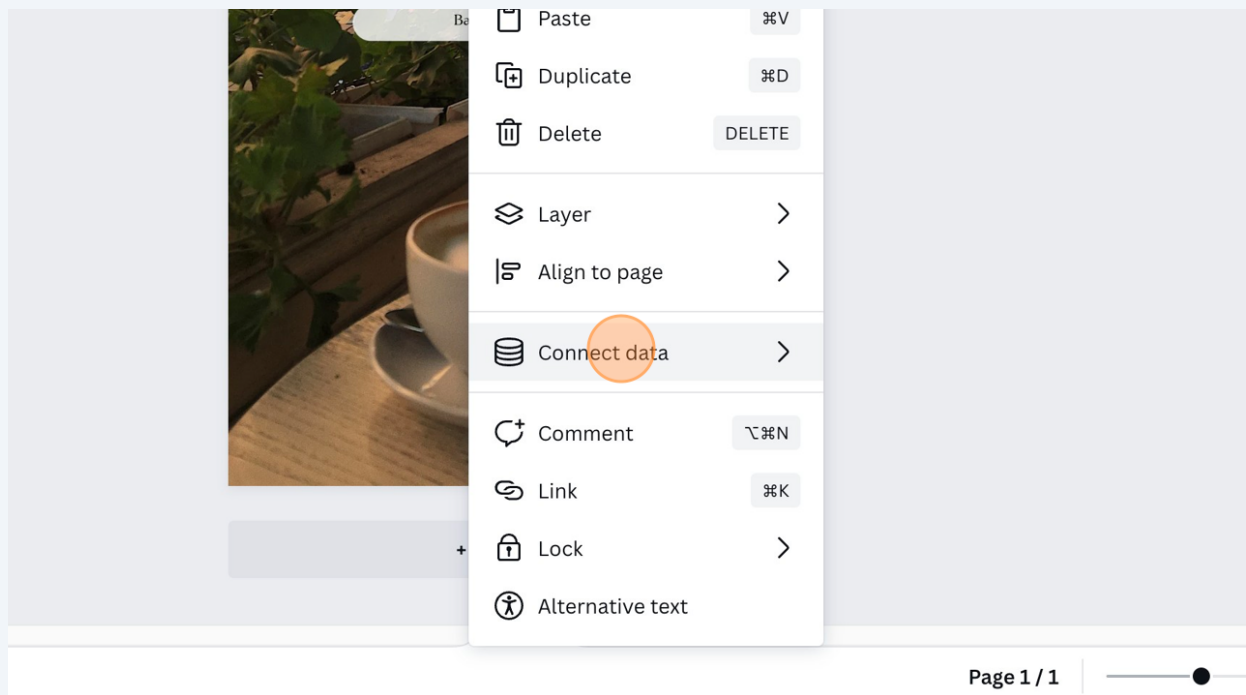

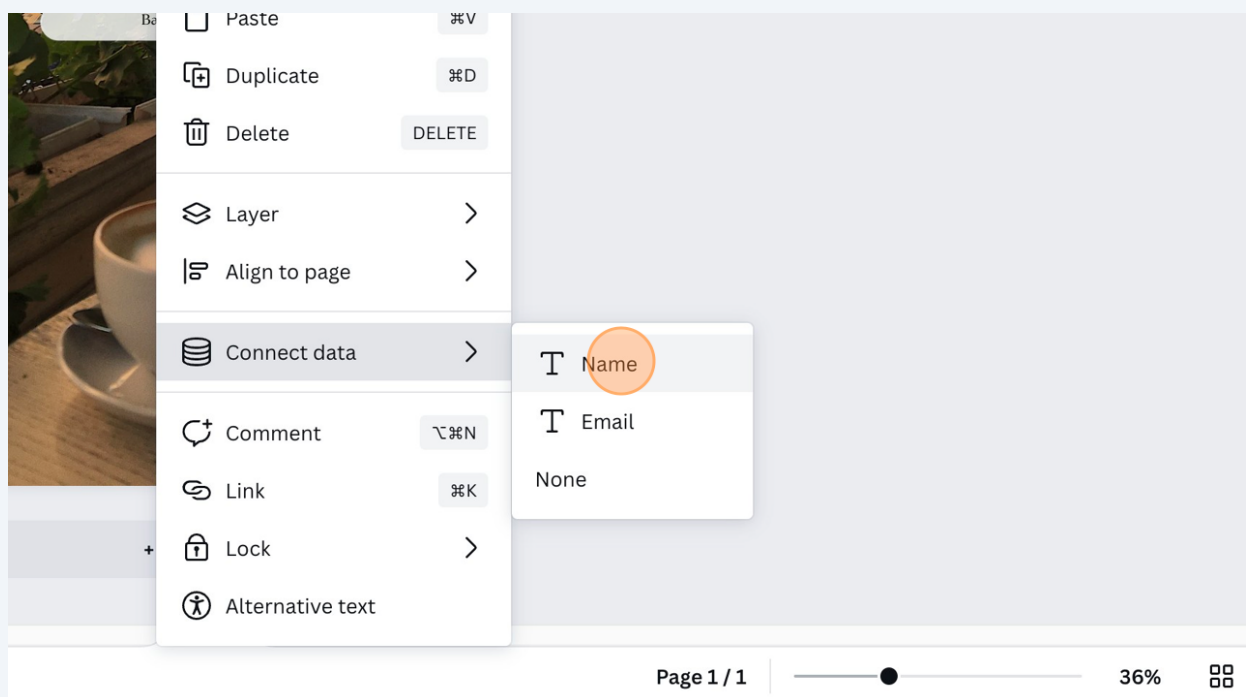

**13** Adjust the text size, color, font, styling here.

14 Right-click on the text box, and find the connect data option.

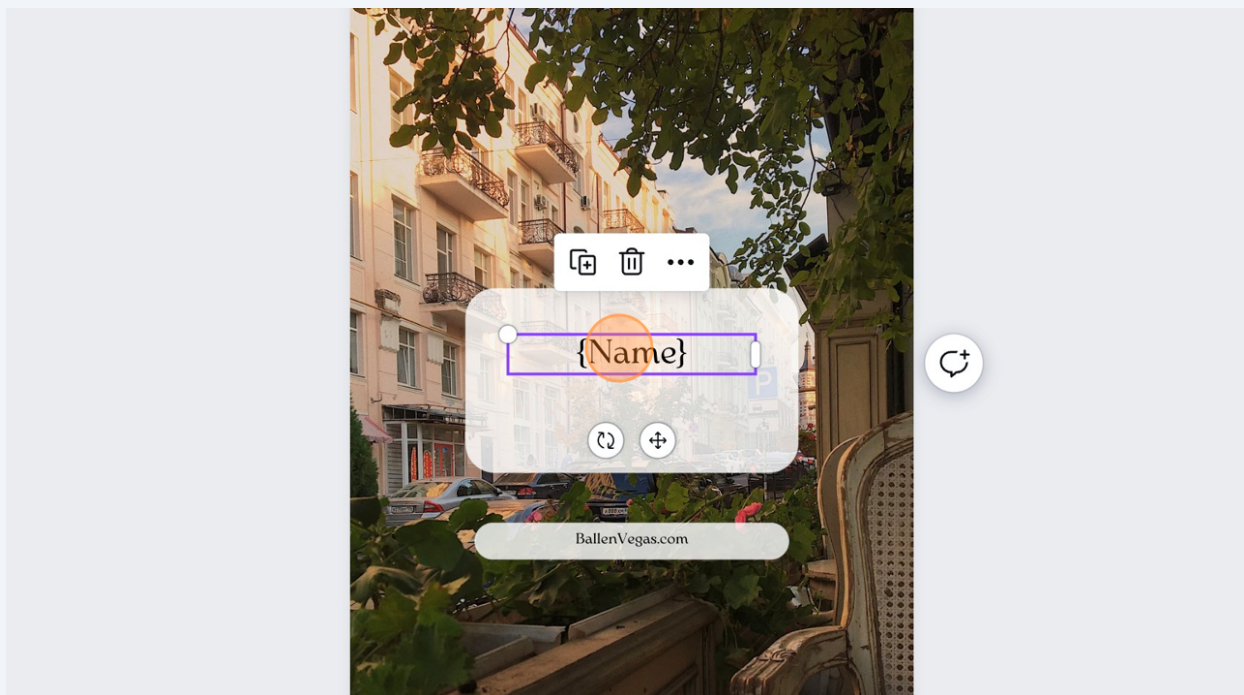

**15** Choose the first column. It doesn't matter how it was named.

16 Click "Name"

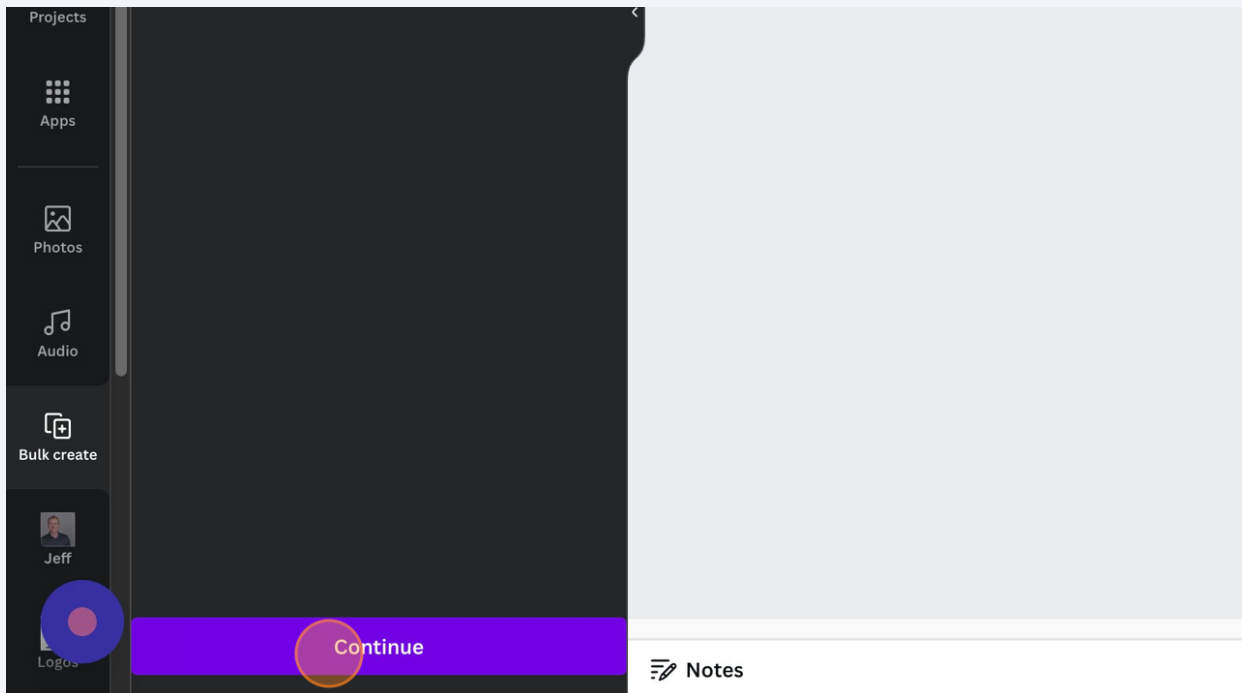

17 The merge field will appear.

18   Follow this step with each column you want to connect data with.

**19**   You can adjust the text line spacing and letter spacing here.

20 Click "Continue"

22 make minor edits where needed if you notice any overlap

To sell your house faster, curb appeal matters, so spruce up the front of your home with fresh paint, landscaping, and a well-maintained lawn.
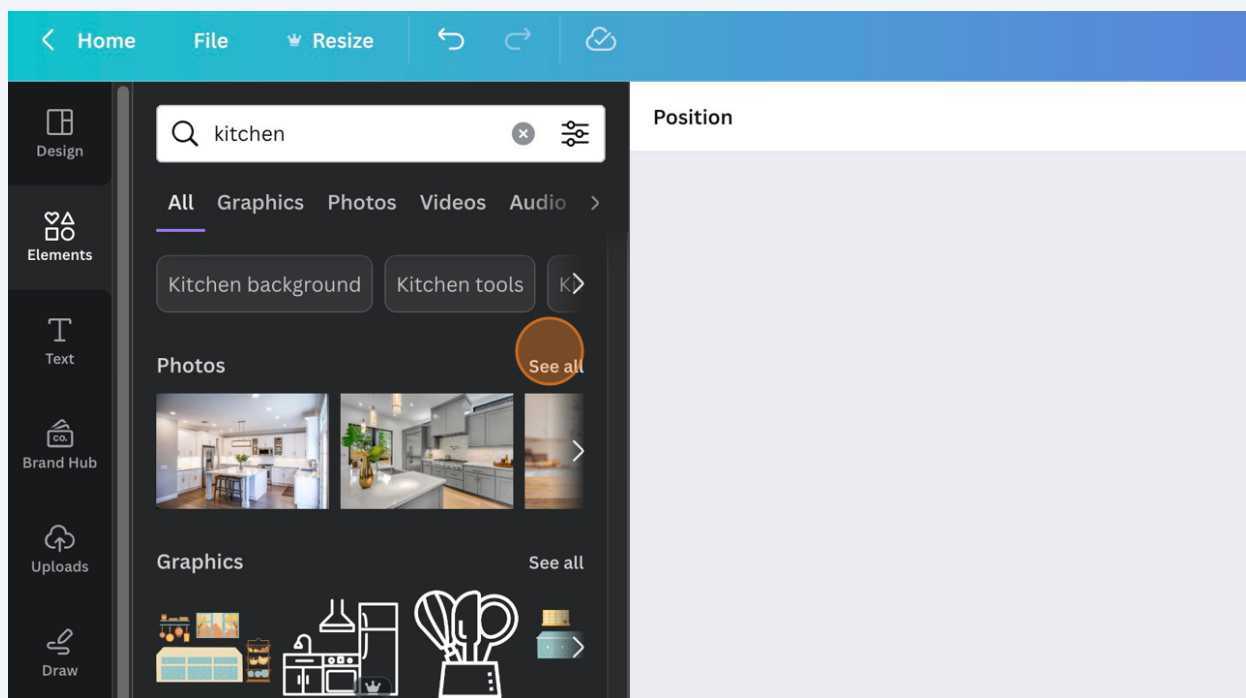

BallenVegas.com

**23** Click on elements, then search by keyword for images you want.
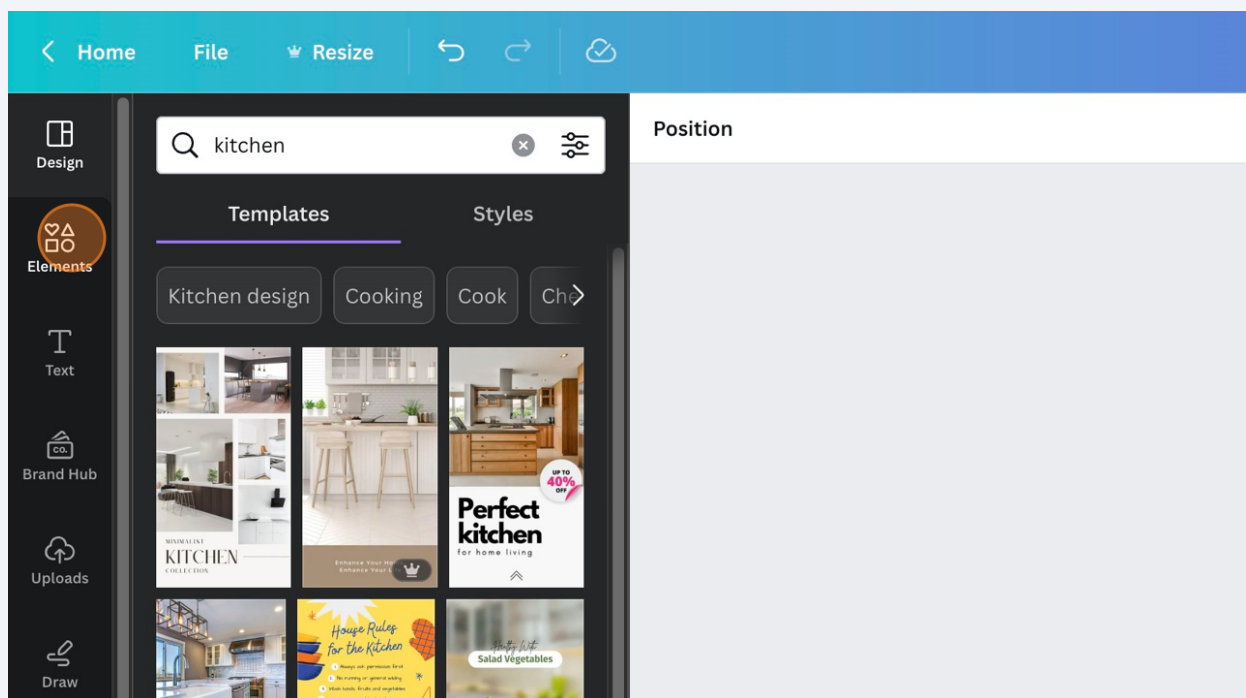

24 You can also choose backgrounds and search for solid backgrounds.
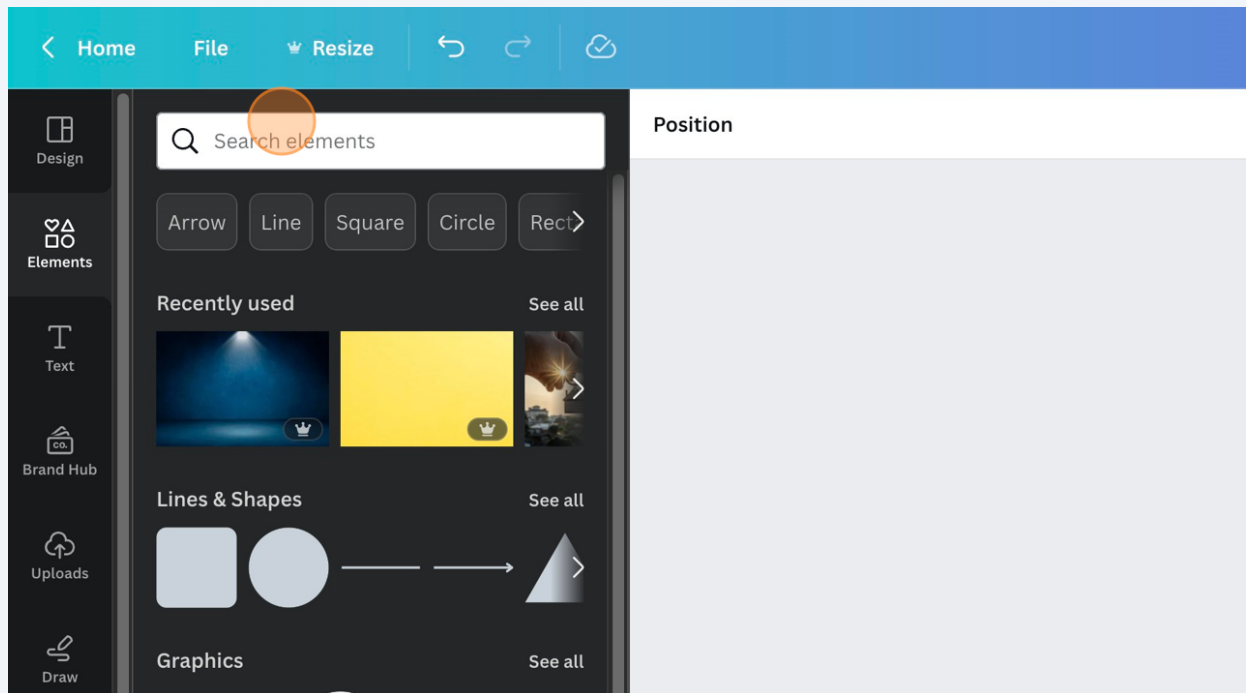

**25** Click on see all when your photos appear
26 Click this icon to open filter options

27 Click "Vertical"

28 Click "Static"

29 Click "Add this photo to the canvas"

**30** Find a photo you like and simply drag it to the pin and should replace the photo in the background. If you used frames and connected the photo to the frame, you can skip this step or replace photos you don't like.

31 If you double click on the photo once it's on the pin, you can slide the image up, down, left, and right to position it as you like on the pin.
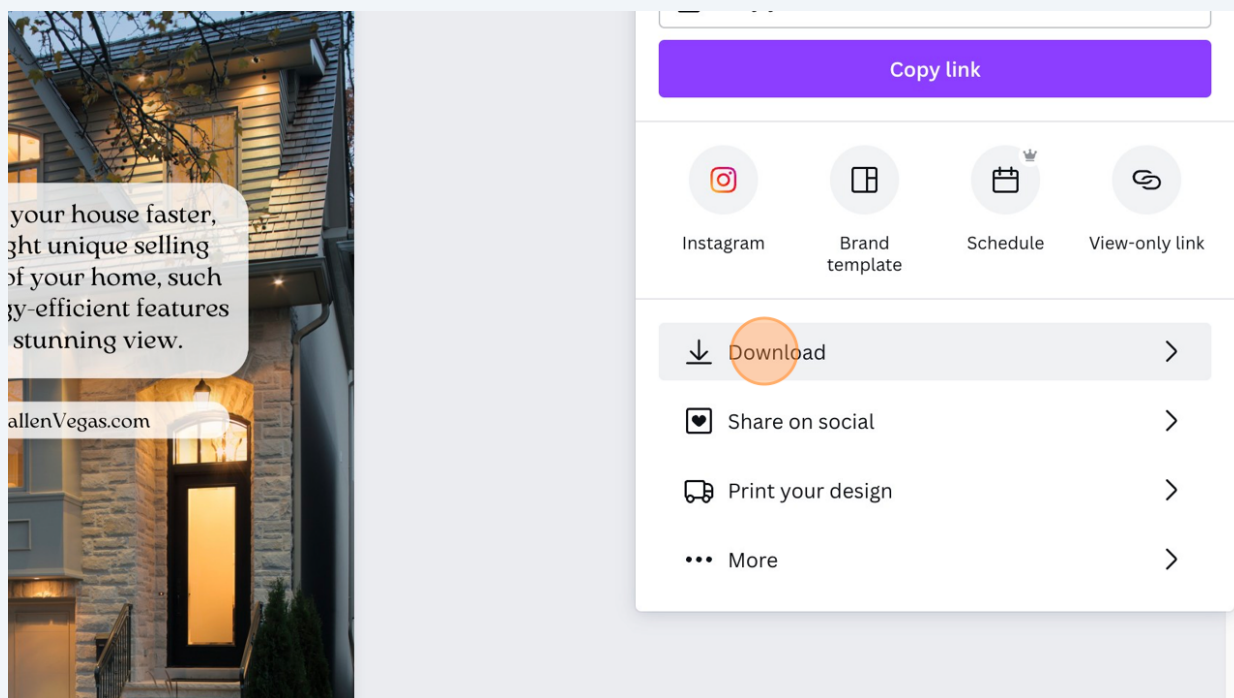

32 Once you complete all 52, click Share

33 Click "Download"

34 Click "Download" and save all to a folder. They will save as a zip file. Once downloaded, double click the zip file to open all of the images in a separate folder.

35 Open Pinterest.
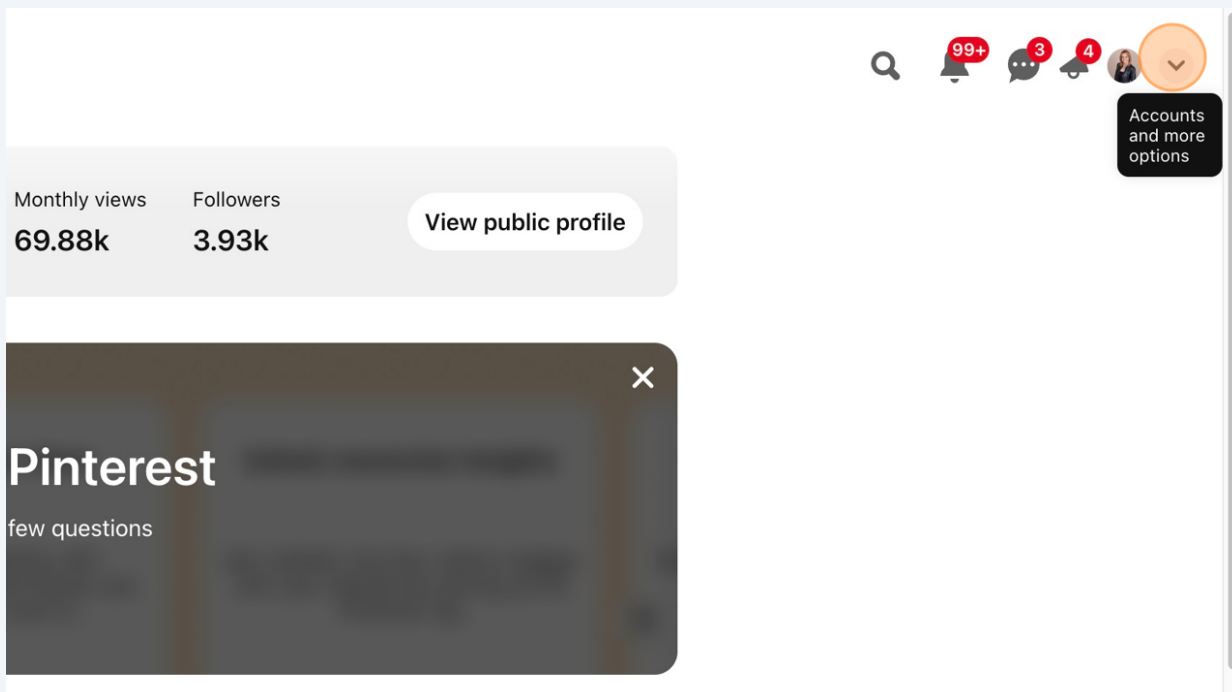

36 Click "Create"

37 Click here.
