

# Lesson 1

Hello everyone, this is Alexey Borealis, astrologer, psychologist and founder of the "Clear Astrology" project.

Welcome to the course "How to Know a Client's Deep Concern Before He Even Says a Word."

Before starting this course, you must have completed the courses.

- "Makes your 1st Forecast in Under 2 Hours."
- "Make Four Accurate Forecasts in 1 Hour."

In this course, you will learn how exactly the stars influence the person and create the flow of events that we call his "biography."

You will get acquainted with a group field, group roles, and how they are related to stars.

Next, we will dive into the subconscious and see how the horary chart reflects the psychological processes. You will see the way that horoscope highlights the client's concerns.

Then we'll move on to the technical side of the issue. You will learn about the technique of Arabian parts and the radicality of the chart.

You will learn to read the client's concerns in the horary chart and understand the question before the client says a word.

At the end of the course, we will have practice with real horary charts. So let's dive in.

See you in the next lesson.
