

Painted Papers 101

*Please review the video about supplies. **There is no need to purchase every supply on this list.** Watch the videos and purchase the supplies that most interest you in the colors you like the best. Some lessons include more specialized supplies, including stamp pads, inks, powders, and sprays. I offer these lessons so you can see how these supplies work, determine if they are something you might want to purchase, and learn how you can use them to create painted papers. Several lessons require a gel plate, but it is not necessary to have one to create painted papers. Watch the lessons and determine for yourself if a gel plate is something you wish to invest in.*
