

# Advance information June 2022

## AS Biology (7401)

### Version 1.0

Because of the ongoing impacts of the Coronavirus (COVID-19) pandemic, we are providing advance information on the focus of June 2022 exams to help students revise.

This is the advance information for AS Biology (7401).

## Information

- This advance information covers all examined components.
- For each paper the list shows the major focus of the content of the examination; the topic areas are listed in rank order, with the areas carrying the highest mark allocations at the top of each list.
- Topics not explicitly given in the list may appear in multiple-choice items, low tariff questions, or via synopticity.
- Assessment of practical skills (section 8.3 of the specification) and maths skills (section 6 of the specification) occurs throughout both papers.
- It is not permitted to take this advance information into the examination.

## Advice

- Students and teachers should consider how to focus their revision of other non-listed parts of the specification, which may be tested in lower mark questions.
- Students will still be expected to apply their knowledge to unfamiliar contexts.
- Students will be expected to draw on knowledge, skills and understanding from across the specification when responding to synoptic questions.

---

## Focus of the June 2022 exam

---

The inclusion of Required Practicals in the lists below should not be taken to imply direct references to those procedures quoted in the Practical Handbook. They are there to give a general idea of the context in which practical work is being assessed.

### **Paper 1 7401/1**

- 3.2.1 Cell structure
- 3.2.3 Transport across cell membranes (including Required Practical 3)
- 3.2.2 All cells arise from other cells (including Required Practical 2)
- 3.2.4 Cell recognition and the immune system
- 3.1.4 Proteins
- 3.3.4 Mass transport
- 3.3.3 Digestion and absorption

### **Paper 2 7401/2**

- 3.3.4 Mass transport (including Required Practical 5)
- 3.3.2 Gas exchange
- 3.1.2 Carbohydrates
- 3.4.3 Genetic diversity can arise as a result of mutation or during meiosis
- 3.4.7 Investigating diversity
- 3.4.5 Species and taxonomy
