# Information

## **Certified Design for Six Sigma Black Belt**

The Certified Design For Six Sigma Black Belt is a professional who can explain Design For Six Sigma philosophies and principles, including supporting systems and tools. A Black Belt should demonstrate team leadership, understand team dynamics, and assign team member roles and responsibilities. Black Belts have a thorough understanding of all aspects of the IDDOV methodology in accordance with Design for Six Sigma principles. They have basic knowledge of robust & lean enterprise concepts, are able to identify non value-added elements and activities, and are able to use specific tools for robustness.

#### Examination

Each certification candidate is required to pass a web-based examination that consists of multiple-choice questions measuring comprehension of the DFSS Body of Knowledge. The Design For Six Sigma Black Belt certification examination is a 80 multiple-choice question examination. It is offered in English and is web-based.
