Enjoy the RV Journey

Welcome back,

I was thinking about a topic to write on for this month's featured article and RV trends came to mind. After some research in current RV trends one (questionable category in my opinion) kept showing up. Electric

RVs. The part I questioned was, how electric RVs are the future of the RV industry. I disagree, but you be the judge. Read this

month's feature article (below) for more information.

Enjoy the newsletter, and as always if you have family or friends who like RVs and the RV lifestyle please share with them too.

This Month's Feature Article

Electric RVs and Tow Vehicles - Good or Bad Idea?

I was researching “RV trends” and the future of the RV industry, and quite frankly I was surprised by one category in particular that kept coming up. Electric RVs. I’m going to go out on a limb here, and I might be wrong, but I do not see electric RVs as the future of the RV industry. Why not, you ask? Let’s examine this topic a bit closer.

RV 101® - 10 Tips for Hot Weather RVing

The tires on RVs support the entire loaded RVs weight. That is why this topic is so important. RV tire inflation pressure needs to be checked when the RV is taken out of storage, before leaving on an RV trip, and while you are traveling. The problem is, finding a portable air compressor capable of inflating some RV tires, that you can keep in the RV. . [WATCH NOW](#)

The Original Equal-i-zer® Sway Control Hitch

Why is Sway Control Important When Towing?

Sway control is the act of minimizing the amount of side-to-side movement of a trailer while driving. Trailer sway is caused by wind, road conditions, passing semi-trucks, sudden braking, and improper trailer loading. It is recommended that a **weight distribution hitch with built-in sway control** or sway bars be used to increase vehicle stability and combat sway.
