

THE MISSING POWER

She's been in church all her life. Got saved at a mere five years old. She was actively involved - Choirs, Sunday School, church activities, on the Youth Committee, attending church every Sunday and Bible Study every Wednesday. She even attended Ladies' Fellowship as a young lady.

She knew the Scriptures, well, enough to know enough. She got married and became even more actively involved because of her new role. She was at church 24/8, yes 8 with her husband, even when no one else was present.

All her years she received very solid teaching and her genuine strong desire to know more and serve God only grew, especially when He called her into her purpose.

Yet, it still felt as if something was missing...

She had heard others talk about hearing God speak to them. She had seen power seem to exude from others' lives but...she did not know it to that degree.

Then she began to seek God and pray. She began to apply principles she had been learning, to what she had already known.

God answered. He answered powerfully.

THE MISSING POWER

You see, she had been talking to God all these years, but never took the time to listen to Him talk back.

She never understood the power of just sitting and listening...listening to His voice.

She never knew the power of meditation. It was never taught to her.

She never knew the power so deep in this simple act. Her life was transformed.

That girl was me.

Can you relate? Is this power missing from your life?

This is why this course was created, so you too can have this experience as a woman of God.

This course will help you experience the presence of God and hear his voice through meditation. You have made the right decision to begin a major transformation.

Be sure you are using your 90-day journal to record your experience. See how you've grown. Hear God's voice for yourself. Understand how your brain functions in this process. Experience His power at work. Allow it to be great in your life.

Now on to Module 4 - The Holy Spirit and His Power Within
