## Design Beautiful Pages

### Lesson 04-01: Beautifully Blended Creative Team Inspiration

There are many ways to apply blending to your pages, so take a look at how our Creative Team knocked it out of the park with their pages!

#### Fully Blended Pages

Danica uses blending to add depth and texture to her beautiful image. Her cute cluster and title add just the right touch to finish her page.

Font: Viola

Terri kept the blending soft, which was suitable for her subject. The entire focus is on that sweet baby!

Fonts: Cafilisch Script Pro Light, Bromillo Regular

Vynette created a delightful blended page with an inspiring message. The blending helps draw you in but it doesn't overwhelm the page.

## Blended Background With 3D Photos And Elements

This page by Vynette is a great example of a blended background. I love the repetition of the purple color and the diagonal line created by the placement of her elements and journaling.

Kit: Perfection by Angie Briggs

Extras: Sista by Laura Banasiak (beads)

Fonts: Burford Rustic Inline Bold

This page by Terri is another good example of background blending. It adds that extra bit of interest without overwhelming the page.

Corbel Regular

On this page by Kathy the background blending is intentionally bold and dramatic, which adds contrast to the small, serene, silhouette photo. That juxtaposition is really powerful!

Kit: Stories 365 by Kristin Cronin Barrow

Joyce also created bold blended background with a focal point consisting of a photo, elements, and title, so you can use background blending in a variety of ways!

Terri used layer masks and clipping masks to create her beautifully blended page. Doesn't it mentally take you to your happy place?! So peaceful. Terri drew attention to the bridge by clipping the same photo to a 3D clipping mask.

Here's another serene blended page by Donna. Blending doesn't have to be in your face to be effective as this page demonstrates.

It's OK to have a lot more going on in a blended page as you can see in this page by Danica. The colored layer mask behind the photo and the 3D elements above are very effective. They immediately focus your attention on her great photo!

This blended page by Deborah almost defies any blending category. It's so creative and fun and the blending is perfect! You can see just enough of the photo to understand what's going on, and of course the title helps as well.
