## Fundamental Analysis

eBay is priced as if it fails to thrive in an online marketplace where it is still a strong competitor, since it generates stable sales and a good profit margin. It works like a money printing machine all year long due to being only behind Amazon. In addition, eBay's shift to the marketplace with renovated goods, the regulated payment system continues to protect its marketplace and raise its profit margin.

The only larger player in eBay's space is Amazon, so it puts eBay in a good spot. As for the machine learning models, they show an upward trend, but a rocky Q2 going forward. Overall, eBay appears to be a steady climber.
