No Test, Pre-Preliminary, Preliminary, Pre-Juvenile Spins:

If an execution error in one of the spins results in a call that causes the other spin to be asterisked (resulting in no value because it's not according to requirements), the procedure is as follows:

For example, if prior to review the two spins for a pre-juvenile program are listed as:

- CSp (no level) – due to an error on an intended CoSp or CCoSp
- SSp2* – not according to requirements

The code should be changed to:

- CoSp or CCoSp (no level) – the required spin
- SSp2 – no asterisk

This procedure ensures that the skater is not penalized twice (in this pre-juvenile example, for repeating the spin in one position.) However, if it is determined by the technical panel that the skater is clearly attempting a spin which is not according to specific level requirements (e.g. a spin in one position with a change of foot in pre-juvenile; or a second spin of the same character as the first) the technical specialist calls the spin that is actually performed and not the elements that are required. Any incorrect elements will receive an asterisk* that will result in **No Value**.
