

Houses

Houses represent an area of the sky we see from our point of view on earth. If you look at the rising sun, you are looking at the first house. If you are looking above your head, you are looking at the 9th/10th house. If you are looking at the setting sun, you are looking at the seventh house. We can see part of seventh, first and cannot see 6-2. The houses never move, they are fixed. They symbolize an area of life. They describe where the planets and signs are acting in your life. There are twelve houses, just like there are twelve signs. They show the position of the sky.
