

MODULE SEVEN

Setting Your Goal With Soul

Introduction

As we all know, the ONLY way to bring your intangible vision into the three dimensional world is to take actions with soul-aligned goals. Taking massive action is not enough, we need to take really realistic and measurable action. So goal setting is the most important part of achieving your dreams.

In the previous modules, we have worked on yourself-clarify through deep self-reflection, breaking limiting beliefs, gaining a deep understanding of your values and crafting your masterpiece. One sentence that my mentor always told me is stuck in my head, which is “keep your feet on the ground and keep reaching for the stars”. So, please enjoy this module and set realistic goals with your souls and make them happen. ;)
