Top Five Takeaways

Get your mind ready for your new style.

- Let go of negative self-talk and think about the life you want to be leading (then dress for THAT life!).
- Dress as the successful version of **yourself** 5-years from now.

Clean out your closet!

- Let go of what doesn't fit you, doesn't please you, and hasn't been worn in 2+ years.
- Make your closet pleasing to be in, and only have clothing/shoes/accessories stored there.
- Make some space for all that new style!

Shop like a pro!

- Take a list with you of items that will fill the gaps in your clean closet now that you have cleaned it out (80/20 rule!).
- Don't buy it unless you love the fit, shape, color, material, price, AND it fits your actual lifestyle. **ALL OF THOSE CRITERIA!**
- Fill in the gaps first where you spend most of your time (example: work, weekend, etc).

Styling is easy if you know what you're looking for.

- Get clear on the message you want to send and who you want to be in five years, then dress like her.
- Do research and make an idea board to help you.

Styling is easy if you stick to the formula.

- Basic Outfit + Finishing Piece + Accessories = Put-Together
- Add hair and makeup to finish the look if you're into that. A consult with a makeup artist is a great treat to learn the basics (be sure to specify which area of your life you need a new look).

Style
yourself
for the life
you want.

(And your closet can help you get there!)

*For a less matronly look in a suit, still wear a skirt or pants and a blazer/jacket, but make sure they don't match. They should 'go', but not be from the same suit. Stick with neutrals so you can easily mix and match your separates. You can trade out separates for a dress, but keep the blazer/jacket as nothing polishes a look more. You'll notice that all the interview outfits are the same. That's because your blouse and accessories are where you will show your personality, but it is an interview so go understated to let yourself shine as the right person for the job. You want them to remember you, not your kooky jacket. Oh! And a nice trench is a great cold weather/rain option for over your outfit. Remember, they are making judgements within the first three seconds and they might see you in your coat.

Color Guides

Remember, women with warm undertones tend to look better in warm color pops and certain neutrals, while women with cool undertones tend to look better in cool color pops and certain other neutrals. Women with neutral undertones tend to look great in most colors, but sometimes have a color or two that wash them out. How do you know? Get a consult with a makeup artist to know your undertones and get into a dressing room to see colors on you!
