

PRETTY
HANDMADE

EQUIPMENT CHECKLIST

Highly needed

TO STYLE

WHITE HARD SURFACE

I have an Ikea white table top like [this one](#). 4 years later and I still put it over my chest of drawers. I love this set up!

WHITE FOAMBOARD X 2

These are cheap and you can find them at your local DIY hardware store or an art and crafts store. A1 is a good size and will allow a better light reflection.

A WINDOW

Check the North, South, East and West expositions of your house. I personally prefer the window that faces East.

TO SHOOT

DSLR CAMERA

Second-hand is much better. Or borrow one from a friend if possible if you never used a DSLR before. More on this before the course starts

TRIPOD

I started with a very simple tripod. No need for something too fancy yet :)
Second-hand is also great.

SD CARD

I use a [32GB size card](#), and I have a second one just in case.

TO RETOUCH

ADOBE PHOTOSHOP

[The latest version](#) if possible. It costs around \$10 per month.
And a good working computer.

Optional, but good extras

CAMERA REMOTE
CONTROL

I have [this one](#) from Canon, it's really good if you have your camera on a tripod and you want to be able to re arrange items on your scene without having to go back and forth all the time.

DIFFERENT
BACKGROUNDS

You can look in your house for simple things as a blanket, a nice piece of linen etc that you can use to alternate from the white background piece.

STEP STOOL

I have [this one from Ikea](#) and I love it.
