

3422206 - Access to Type Systems of Integration Advisor in Trial Accounts

Component: LOD-HCI-PI-SUG (OnDemand > SAP Cloud Integration > Process Integration > Integration Advisor: Intelligent Mapping tool), Version: 1, Released On: 31.01.2024

Symptom

You subscribed to SAP Integration Suite and activated Integration Advisor in your trial account. You want to access a type system, but it is shown as unlicensed in the library of type systems and you get the message "You do not have valid license for the type system." if you want to open it.

Environment

SAP Integration Suite, SAP Business Technology Platform, Cloud Foundry, trial

Reproducing the Issue

Navigate to Discover -> Type Systems, and try to open the entry "ASC X12". Then, an error message "You do not have valid license for the type system." is displayed.

Cause

Trial subaccounts do not include licenses to use the following type systems:

Type System
ASC X12
GS1 EANCOM
GS1 XML
JAIF EDIFACT
Odette
Odette EDIFACT
TRADACOMS
UN/EDIFACT
VDA EDIFACT

But there is a trial option available which can be activated explicitly.

Resolution

Depending on the landscape in which your trial account is located, navigate to one of the following URLs:

- US10 trial: https://*.integrationsuite-trial-iadv.cfapps.us10.hana.ondemand.com/shell/ownprofile
- AP21 trial: https://*.integrationsuite-trial-iadv.cfapps.ap21.hana.ondemand.com/shell/ownprofile

where the asterisk (*) must be replaced with the subdomain of your trial subaccount (visible, e.g., in the overview page of your subaccount). By selecting "Trial" in the respective row, you can activate the trial licenses of the respective type systems. However, note that only one message per type system is included in the trial license:

Type System	Message Type
ASC X12	850
GS1 EANCOM	ORDERS
GS1 XML	orderMessage
JAIF EDIFACT	ORDERS
Odette	ORDERR:2
Odette EDIFACT	ORDERS
TRADACOMS	ORDHDR_FILE:9
UN/EDIFACT	ORDERS
VDA EDIFACT	ORDERS

That means, you can browse and view all message types but only use those listed in the table for your MIGs and MAGs.
