

REACH AND ROHS COMPLIANCE: PROTECTING REVENUES WITH ADVANCED COMPLIANCE

2 Day Virtual Course

COURSE DESCRIPTION

This 2-day seminar will go into the specifics of the REACH and RoHS regulations, provide case studies and share lessons learned so your organization can benefit from the mistakes of others. We will review the latest on both directives and will draw out key developments and key dates (if applicable) with particular emphasis on requirements for US firms.

REACH and RoHS have been referred to as "...one of the most complex regulations in the history of the EU." Do not miss this 2-day seminar to find out why.

REACH and RoHS conformity have banned problematic toxic and environmentally hazardous elements such as lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) and polybrominated diphenylether (PBDE) in quantities not exceeding a maximum of 0.1 percent by mass in products and new phthalate additions as a 2019 amendment.

Restrictions of the use of certain Hazardous Substances (RoHS) and Registration, Evaluation Authorization and Restriction of Chemical Substances (REACH) are European requirements on chemicals and chemical substances used in products.

REACH is required by the EU for products containing chemical compounds. It is also required by US exporters for all suppliers exporting products to the EU. Even though you may not be an exporter, you may have to still comply with these regulations.

OBJECTIVES OF LEARNING

After the completion of this seminar, the participants will be able to do the following:

- Understanding your organization's liability under RoHS and REACH.
- Review case studies.
- Discuss lessons learned applications to ensure full compliance.
- RoHS and REACH guidelines
- REACH Registration of Substances
- Introduction to REACH
- Articles and REACH
- Substances of Very High Concerns (SVHC)
- Supply chain communication
- Compliance enforcement
- Basics of RoHS
- Background and content of RoHS
- Responsibility for RoHS
- International requirements of RoHS
- Material testing methods
- Build and manage RoHS/REACH compliance programs
- Reporting to management and government agencies
- An introduction to Global RoHS/REACH legislation, WEEE, Conflict Minerals, Anti-trafficking regulations, and CA Proposition 65
- Methods of regulatory data collection
- Compliance consulting on company real world scenarios

REACH AND ROHS COMPLIANCE: PROTECTING REVENUES WITH ADVANCED COMPLIANCE

2 Day Virtual Course

TRAINING AGENDA

Day 1

- REACH Registration of Substances
- Introduction to REACH
- Articles and REACH
- Substances of Very High Concerns (SVHC)
- Supply chain communication
- Compliance enforcement
- Basics of RoHS
- Background and content of RoHS
- Responsibility for RoHS
- International requirements of RoHS

Day 2

- A Process for Protecting Revenues
- 10 Steps to building a RoHS/REACH compliance program
- Determining best practices for collecting data
- Managing legacy systems and parts
- Improving data collection by using Jig 101, IEC 62474, IPC 1752
- Understanding 3rd party compliance software platforms
- Manual and automated data collection
- Building management reports for sourcing decisions
- Incorporating compliance into standard business practices
- Building templates for policy and procedures
- Incorporating compliance processes into ISO 9001:2015 documentation
- Building a documented system for proof of due diligence
- Implementing a RoHS/REACH compliance maintenance program
- REACH SCIP database
- New UK versions of RoHS and REACH
- Conducting compliance audits

WHO WILL BENEFIT

- Automotive
- Electronics
- Medical devices
- Chemical
- Toys
- Industrial machinery
- Manufacturing Professionals
- Anyone new to RoHS and or REACH and need to understand the regulations
- Anyone responsible for RoHS and REACH compliance
- Quality Managers
- Environmental Managers
- Purchasers

FACULTY KELLY EISENHARDT

MKelly Eisenhardt is Co-Founder and Managing Director of BlueCircle Advisors responsible for business development, consulting, and training services focused on environmental compliance and corporate social responsibility. Her experience working in technology and sustainability roles for companies such as EMC, PTC, and Fair Factories Clearinghouse have given her a strong foundation to create compliance programs, build sustainability and reporting programs, implement data collection technologies, and manage initiatives that identify CSR risk in facilities, products, and supply chains
