

In this week's course, the student will identify whether the number of objects in one group is greater than, less than, or equal to the number of objects in another group. They will also compare two numbers between 1 and 10 presented as written numerals.

This week will be **FUN**, *engaging*, and exciting. We will learn and become great mathematicians together. We will work hard and do our very best! Remember it's NOT magic, it's math!

What you'll be learning to do during week 4:

- Day 1: Identify a number that is greater than the other.
- Day 2: Identify a number that is less than the other.
- Day 3: Identify numbers that are equal to one another.
- Day 4: Compare two numbers within 10.
