

## Welcome to Cluster Queen!

I'm Jen White, your instructor for Cluster Queen, and I'm super excited to have you along on a journey that was designed to strengthen your confidence and skill in the area of clustering.

I can't wait to share with you my favorite part of developing a scrapbook page—the time I spend applying the all-important finishing touches. These are the things that make every scrapbook page unique and wonderful.

## Assignment #1

There are five videos in the next module -- Getting Started with Clusters. Some of the information might be review, but much of the content was designed to eliminate any surprises and confusion.

**NOTE:** The Getting Started videos are only an introduction. Each of the 10 lessons following will bring out new ideas and possibilities, as well as my design thought process.
