

# Resources I use:

## 1. Adobe Creative Suite (Photoshop, Illustrator and InDesign)

You only require [Adobe Illustrator](#) for this course. So if you do not have [Adobe Illustrator](#) already, then please [buy it here](#) so you can start this course.

## 2. Wacom Tablet (Cintiq 13")

There are a lot of graphic tablets you can buy. The one I have is a [Wacom Cintiq 13"](#) which has its very own display. If you're not ready to invest in one like this, you can also go in for a [Wacom Intuos](#) which is only \$71 at the moment.

## 3. Becoming a Successful Illustrator Guide

This is a guide to becoming a successful Illustrator. After you finish the course and you get a hang of creating digital illustrations, then I really suggest you buy [this book](#). [This book](#) helps you discover the professional side to illustrating.

It teaches you how to self-promote your work, how to approach agencies how to write your contracts and all the other nitty gritty that is involved with illustrating. This is basically my Bible for illustrating. If you prefer reading all this by yourself instead of investing in a full-fledged program, then this is definitely a better option. [Get it here!](#)

I'm a self-taught illustrator and I wanted to create a course that will help anyone (who's interested in creating illustrations) make them easily.

Feel free to email me any related queries or questions at [me@maryangela.in](mailto:me@maryangela.in)

Have a great day!
