

# Domain-based Group Policies

## Examine Group Policy in AD DS

### Objectives:

At the end of this episode, I will be able to:

1. Implement Group Policy in AD DS.

### Key Points:

What are group policies and group policy objects (GPOs)?

To which AD DS levels are GPOs deployed?

What is the hierarchy of GPO application?

Where are GPOs stored?

How often are GPOs updated on a computer?

How can you update a computer sooner?

What if more than one GPO is applied to a site, domain, or OU?

What is meant by "Loopback processing" of group policy?

What is the Block Inheritance feature?

What is the Enforced feature?
