

Hyper-V and Guest Virtual Machines

Configure Integration Services

Objectives:

At the end of this episode, I will be able to:

1. Configure integration services.

Key Points:

What is the purpose of Integration Services?

Which tool is used to configure Integration Services?

List and explain the different services included in Integration Services.

Which service in Integration Services is DISABLED by default?

Compare and contrast the `Get-VMIntegrationService`, `Enable-VMIntegrationService`, and `Disable-VMIntegrationService` PowerShell cmdlets.
