

# Windows Server and Workload Management Using Azure

## Implement Azure Automation

### Objectives:

At the end of this episode, I will be able to:

1. Implement Azure Automation for hybrid workloads.

### Key Points:

What is Azure Automation?

What must you configure for Azure Automation?

What is meant by Automation pricing?

What are the components of Azure Automation?

List the steps for deploying Azure Automation.

List and discuss the steps for creating an Azure Automation account.
