

# On-Premises and Hybrid Network Connectivity

## Implement and Manage the Remote Access Role

### Objectives:

At the end of this episode, I will be able to:

1. Implement and manage the Remote Access role.

### Key Points:

What is the purpose of a Remote Access Service (RAS) server?

Which protocol includes the VPN Reconnect and AlwaysOn features? What do each of these provide?

List and describe the three role services that are available when you choose to install the Remote Access role.

What is the purpose of DirectAccess?

Compare and contrast SSTP, PPTP, PPPOE, L2TP, IKEv2, and GRE ports.
