

# Active Directory Domain Services (AD DS) Security Principals

## Manage Users and Groups in Trust Relationships

### Objectives:

At the end of this episode, I will be able to:

1. Manage users and groups in multi-domain and multi-forest scenarios.

### Key Points:

What are some reasons for establishing a trust relationship?

Explain how trusted and trusting domains work.

Which AD tool should you use to add groups and users from a trusted domain to groups in the trusting domain?

Discuss the steps for adding groups and users from a trusted domain to groups in the trusting domain.
