

On-Premises and Hybrid Network Connectivity

Implement and Manage Network Policy Server Role

Objectives:

At the end of this episode, I will be able to:

1. Implement and manage Network Policy Server role.

Key Points:

What is the purpose of Network Policy Server (NPS)?

Explain the relationship between an NPS server, RADIUS clients, and RADIUS proxy.

Discuss the deployment of RADIUS clients and Remote RADIUS server.

List and discuss the steps for configuring Network Policies in the Network Policy Server console.

Compare the Conditions and Constraints sections when configuring a network policy.

List and discuss the steps for configuring Accounting in the Network Policy Server console.
