

Active Directory Domain Services (AD DS) Components

AD DS Functional Levels and FSMO Roles:

Objectives:

At the end of this episode, I will be able to:

1. Identify and explain AD DS functional levels and Flexible Single Master Operation (FSMO) roles.

Key Points:

List the forest and domain functional levels.

What are the forest-level FSMO domain controller roles?

What are the responsibilities of the schema master?

What are the responsibilities of the domain naming master?

What are the domain-level FSMO domain controller roles?

What are the responsibilities of the relative ID (RID) master??

What are the responsibilities of the PDC emulator master?

What are the responsibilities of the infrastructure master>

Which tools should you use to TRANSFER the roles?

Which tools should you use to SEIZE the roles?
