

On-Premises and Hybrid Name Resolution

Configure DNS Forwarding/Conditional Forwarding

Objectives:

At the end of this episode, I will be able to:

1. Configure DNS forwarding/conditional forwarding.

Key Points:

Compare and contrast forwarding and conditional forwarding.

What is the purpose of Root Hints for a DNS server?

Which DNS server is usually added on the Forwarders tab of an organization's DNS server Properties dialog box?

How do you add a conditional forwarder in DNS Manager?

To add a conditional forwarder, which two components must you know and enter?
