

Hyper-V and Guest Virtual Machines

Configure VM CPU Groups

Objectives:

At the end of this episode, I will be able to:

1. Configure VM CPU groups.

Key Points:

What is the purpose of VM CPU groups?

To how many CPU groups may a VM be assigned?

Which command should you use to manage VM CPU groups?

Which tool should you use to obtain the first four sets of numbers you should use for your CPU groups?

Discuss the different parameters of the cpugroups command that you should use.
