

# Multi-site, Multi-domain, and Multi-forest Environments

## Examine AD DS Sites

### Objectives:

At the end of this episode, I will be able to:

1. Configure and manage AD DS sites.

### Key Points:

What is Intra-site replication v.s. Inter-site replication?

What are bridgehead servers?

What are the site link setup requirements?

Which tool should you use to set up sites?

What should you do in DNS when setting up AD DS sites?

Which AD DS component does Microsoft recommend you have at every site?
