

# Windows Server and Workload Management Using Azure

## Deploy Azure Services Using Azure VM Extensions

### Objectives:

At the end of this episode, I will be able to:

1. Deploy Azure services using Azure VM extensions on non-Azure machines.

### Key Points:

What are VM extensions?

How do you run the VM extensions?

What if a new version of an extension becomes available?

Explain the Extensions blade for an Azure Arc-managed server in the Azure portal.

List and discuss the steps for deploying an extension for an Azure Arc-managed server.
