

Multi-site, Multi-domain, and Multi-forest Environments

Configure Conditional Forwarders

Objectives:

At the end of this episode, I will be able to:

1. Configure and manage forest and domain trusts.

Key Points:

Why is conditional forwarding between two forests important prior to configuring the AD DS trust relationship?

Which tool should you use to configure conditional forwarding?

List and discuss the steps for configuring conditional forwarding.

Explain why conditional forwarding should be configured for both forests.
