

# Windows Server Management in a Hybrid Environment

## Configure a WAC Target Machine

### Objectives:

At the end of this episode, I will be able to:

1. Configure a target machine for WAC.

### Key Points:

What is meant by the term "target machine"?

How do I add the target machine to WAC?

What can you manage via WAC?

List and discuss the steps for adding a server that you want to manage to the WAC interface.
