

On-Premises and Hybrid Name Resolution

Create and Manage DNS Zones and Records

Objectives:

At the end of this episode, I will be able to:

1. Create and manage DNS zones and records.

Key Points:

What is the difference between a forward lookup zone and reverse lookup zone?

What is the purpose of an SOA record?

What is the purpose of an NS record?

What is the purpose of an A and AAAA record?

What is the purpose of the TTL value?

Where should you go to manage zone transfers?

What is the purpose of a CNAME record?

What is the purpose of an MX record?

What is the purpose of the priority parameter of an MX record?
