

Active Directory Domain Services (AD DS) Domain Controllers

Examine ntdsutil.exe regarding FSMO roles

Objectives:

At the end of this episode, I will be able to:

1. Examine ntdsutil.exe regarding FSMO roles

Key Points:

What is the difference between transferring and seizing a(n) FSMO role?

Which command-line tool can be used to both transfer and seize domain-level and forest-level FSMO roles?

List and discuss some of the commands available in the Roles (FSMO maintenance) sub-menu of the ntdsutil.exe command.
